

Blast-Resistant Buildings

Built to **protect**.

Sometimes your business finds itself in potentially dangerous areas. ATCO's blast-resistant buildings provide security, safety and comfort for employees working in areas such as oil & gas, mining, and petrochemical plants where safety is a priority. Whether you need a control room, lunch room, office or storage space capable of withstanding the force of a blast incident, our blast-resistant buildings are just one of the many solutions we offer. Utilizing proven and certified **Hunter Buildings** technology, we are fully equipped to meet your specifications.

Custom Building Features include:

- Multi-module complexes for sale or rent
- Varying blast overpressure and duration levels
- Low, medium or high response blast designs
- Class 1 Division II Electrical
- Stackable to two-stories
- Special exterior coatings
- Gas detection
- Windows in doors & exterior walls
- Special equipment / furnishings
- Custom flooring
- HVAC (roof mount/end mount/split system)
- Positive pressure and NFPA 496 compliance
- Data and communication wiring
- Fire detection/protection & suppression
- Upgraded insulation packages
- 3-year ATCO Gold Warranty
